### Editor's Notes:

- ▶ *There is a charge to be included in this guide.*
- ▶ *SaaS Offered: This designation indicates that a vendor offers a solution that is delivered via the Internet and paid for via subscription of a pay-per-use arrangement.*
- ▶ *No. of U.S. and worldwide clients indicates apparel clients. Companies may also serve clients in other verticals, which are not reflected in this number.*

Apparel Business Systems brings more than 30 years of industry-specific expertise to its suite of integrated software, ABSi. These tried and tested applications are used by apparel and footwear companies that demand adaptable, robust business solutions to help them compete locally and globally. ABS offers comprehensive ERP functionality with integrated Warehouse & Distribution (WMS), Supply-Chain/Vendor management (e-Comm Portals & SCM), Financial & Credit management, Business-to-Business and Business-to-End Consumer (B2B & B2C) for Internet self-service, Product Embellishment, Business Intelligence & Reporting, Document Management, Mobile apps and more, all designed to help drive business success. Apparel Business Systems offers a variety of licensing and implementation options including Software-as-a-Service (SaaS). With a proven track record of successful ERP implementations, ABS applications are used by many of the most respected brands in the industry to consistently grow their business, increase profitability and make them more competitive.

ecVision streamlines supply chain processes from design to delivery in a cloud-based collaboration platform called ecVision Suite. Our customers, who are leaders in the apparel and footwear industry, utilize our platform to streamline their workflow, increase visibility and integrate external systems to consolidate data. Through real-time collaboration our customer's internal teams, suppliers and service providers can improve the accuracy, pace and flexibility of doing business globally. This results in shorter product lifecycles and lower product cost, improves sourcing and logistics efficiency and minimizes supply chain risk.

#### SaaS Offered.

The ExactFlat suite of products adds powerful features to leading 3D CAD packages like SolidWorks and Autodesk Inventor. Purpose-built for manufacturers working with industrial, decorative and apparel fabrics, ExactFlat Design Studio enables manufacturers to design, flatten, nest and develop a total cost right within SolidWorks: • **Design:** start with 3D digitized images or models; • **Flatten:** quickly generate production-ready flat patterns; • **Nest:** fully-integrated nesting, parametrically linked to your 3D designs; • **Cost:** automatically generate a complete Bill of Materials. Optimized for CAD-to-Cutter workflows, ExactFlat Design Studio sets a new benchmark for productivity for half the cost of competing systems.

Sourcing • Operations • Sales • Financials  
WMS • E-Commerce • CRM • Mobile

TradeCard helps brands and retailers counter pressures from today's rising costs and consumer demands by automating sourcing transactions on a cloud platform. More than 10,000 retailers, brands and trading partners use TradeCard to become more efficient, agile and transparent. TradeCard is a supply chain collaboration platform that enables trading partners to perform as a strategic supply chain rather than individual parties. Document and workflow efficiencies through TradeCard span multiple trading partners within a supply network to generate time and cost savings. Financial services embedded into the platform lower trade financing costs and reduce credit related risk. Hosted technology and global support provide a low cost to transact. Suppliers are quickly on-boarded by TradeCard's global support team. TradeCard's global network provides infrastructure to shift trading partners or services as economic conditions change.
